

Custom Newsletter

The market is accelerating faster than ever with advanced wireless systems and Internet of Things (IoT) products. To fully take advantage of this new world, proper antenna design is critical for optimal system performance.

Empowering Vehicle Telematics RF performance with Robust Antenna Design reviews the design aspects that will ensure your system is as advanced and capable as possible.

This whitepaper covers these points and more:

- Ensuring proper connectivity
- Telematics as a business force multiplier
- Use-case scenarios
- Importance of the wired infrastructure
- Antenna design considerations

Deliverables:

Unless otherwise specified, creative is due 7 business days prior to the deployment of your content. If a deployment's creative is not received in its entirety within the requested timeline, *Signal Integrity Journal* may need to move your deployment date in order to comply with the current production schedule.

Please submit all deliverables to mwjdigital@mwjournal.com and CC your SIJ Sales Rep.

Please provide the following:

- A complete HTML version of your newsletter (includes housing images on your end)
- Email subject line
